

Battery 78 kWh
Power 408 bhp
Price Rs 61.25 lakh (ex-showroom)

VOLVO C40

Volvo has launched its second EV in India, the C40 Recharge. This is the SUV-coupe version of the XC40 Recharge. The C40 also debuts pixel LED headlamps, a first for a Volvo car in India. It runs the same 78kWh battery pack strapped to a 408bhp dual-motor setup, allowing a sprint from 0 to 100kmph in just 4.7s. Range sits at 530km according to WLTP, which is higher than the SUVs, owing to better battery chemistry and aerodynamics.

MERCEDES-BENZ EQE

Mercedes-Benz India has expanded its EV lineup with the launch of the EQE SUV. Offered in only the EQE 500 4Matic guise, it is the top-spec variant of EQ family. It has clean flowing lines, with aerodynamic efficiency as its primary goal. The SUV comes with an AWD setup of two motors that produce a combined output of 408bhp and 858Nm torque. This means a 0 to 100kmph time of 4.9 seconds and a top speed of 210kmph. A 90kWh battery pack gives it a claimed range of 550km on single charge.

HYUNDAI i20

After making its debut in the European markets a few months ago, the facelift for the Hyundai i20 has finally been brought to India. The hatchback now comes with a new front fascia with a new grille, reprofiled headlamps and new inverted L-shaped LED daytime running lamps. The bonnet now houses the new Hyundai logo. The cabin layout has not been altered but comes with a new grey and black theme. Features include the Bose speaker system, ambient lights, a sunroof and more premium additions such as leatherette seats, door armrests and flat-bottom steering. It continues with the same 1.2-litre petrol engine, with Hyundai choosing not to offer the 1.0-litre turbo-petrol with the standard car, and is expected to be reserved solely for the i20 N Line.

Engine
1.2-litre petrol engine
Power
83 bhp/ 115 Nm
Price Rs 6.99 lakh-11.01 lakh (ex-showroom)
