

Dr Modi, paying respects to her late husband Shri KK Modi

But she refused to give up. Instead she took stock of her capabilities and the things she was passionate about. It came to her that even in school she had a passion for needlework at which she was quite skilled. Out of this emerged Dr Modi's first business venture– BINA'S Boutique. "I took over one of my husband's warehouses and set up a shop. I realized I needed funds, but I was adamant that turning to my family for support was a complete no, no. If I had to get this done, I would have to do it by myself. During my first experience with a bank, while asking for a loan, I clearly remember the horrified look of the manager at my request for a Rs7 lakh loan. A 'Modi' had come for a small loan!" she recalls.

Bina Fashion was a labour of love and great dedication; it was also the foundation stone of Dr Modi's new charter as a business woman. It was a rewarding venture in so many ways for her. "I gave it my all. In return, my work gave me such joy," she says.

LICENSE TO FAIL

Modi Enterprises celebrates the spirit of entrepreneurship, innovative ideas and the courage to experiment with market-relevant concepts. The company actively encourages its people to step forward and take initiatives as leaders of their ideas. It does not believe in reprimanding them even if they fail–for failures can be used as stepping stones to future successes. The company has inculcated a culture and environment to draw the optimum returns in terms of tapping the talent pool it has nurtured.

DR MODI IS LOOKING TO BRING IN YOUNG TALENT IN THE LEADERSHIP TEAM TO WORK IN TANDEM WITH ITS SENIOR LEADERS. WHILE THE YOUNG WILL BRING IN NEW IDEAS, ENERGY AND ENTHUSIASM, THE SENIORS WILL BRING TO THE TABLE THE WISDOM AND THE EXPERIENCE OF THEIR YEARS IN THE COMPANY. THE SEAMLESS COMING TOGETHER OF BOTH WILL HELP CREATE A PERFECT SYNERGY OF THOUGHT AND PROCESSES IN TAKING MODI ENTERPRISES FORWARD ON ITS ONWARD JOURNEY.

CUSTODIAN OF A PRECIOUS LEGACY

The support of her husband and the legacy he has left behind are two things Dr Modi cherishes from her exciting journey as business woman. "I have inherited the rich and vibrant legacy of KK Modi. It's a legacy of care, empathy, integrity and innovation. I firmly believe that my duty as the custodian of this legacy is not just to preserve it but ensure perpetuity. To nurture the legacy, protect it, grow it and ensure that the future generation takes it forward is my moral obligation. It is hard, but I take deep pride in it," Dr Bina Modi shares.

GOING FORWARD

While the consolidation is now in place and the company's businesses are fully back on track with the pandemic in abeyance, Dr Modi is looking to bring in young talent in the leadership team to work in tandem with its senior leaders. While the young will bring in new ideas, energy and enthusiasm, the seniors will bring to the table the wisdom and the experience of their years in the company. The seamless coming together of both will help create a perfect synergy of thought and processes in taking Modi Enterprises forward on its onward journey. That said, this in no way indicates that there is going to be any juggling in the top leadership team. Rather, infusing fresh blood in the organization by way of new ideas and energy through the young talent will help the entire leadership team shoulder its responsibilities with a fresh outlook and renewed vigour to take on the challenges that come its way. The moulding of her team to fall in sync with this approach is sure to yield rich dividends in what is a win-win situation for all stakeholders in the company's well-being.
