WESCHOOL: A FRONT-RUNNER IN MANAGEMENT EDUCATION

Keeping design and innovation at its core, WeSchool endeavours to provide newer avenues to students towards achieving excellence in all spheres of life and nurturing them to become global citizen leaders. WeSchool's philosophy is about using the collective wisdom of 'WE' to nurture insightful thinking and inspire action-based leadership.

With changing times and the rise of edu-tech, MBA programmes have come a long way from what they used to be. The last one and a half years have taught us that it is crucial to prepare for the worst and adapt to the changing times. With aspirants seeking measurable outcomes at the end of the course, and looking to master specific skillsets, B-schools have had to re-invent themselves with time, looking beyond offering general management courses alone. So, apart from MBA programmes in areas like Marketing, Finance and Retail, WE School now also offers customised programmes that focus on Business Analytics, Rural Management, Entrepreneurship and many more.

A front-runner in management education

Among India's top business schools when it comes to adopting unique teaching curriculum, placements and also inculcating entrepreneur spirit in students, WeSchool is focused on imparting management education with an emphasis on design-led innovative thinking for shaping its vision of global citizen leadership. "We strongly believe in integrating the philosophy of 'leadership' and 'innovation', and nurture students with a holistic view on the socio-economic-political matters with a coherent and strategic approach towards problem solving," says Prof. Dr. Uday Salunkhe, Group Director WeSchool.

Upholding the Entrepreneurial spirit

As one of the leading management institutions, WeSchool's rigorous and innovative curriculum is focused on collaborative and cognitive learning. "Our focus is to provide innovative management education, which forms the vision and imparts requisite skills in a successful global citizen leader. We have also developed the WeSchool REDX (Rethinking Engineering Design eXecution) Innovation Lab, in the Mumbai campus since May 2015. It is a unique, bottom-up co-innovation platform designed to address grand challenges in the emerging world.

This lab, in association with various foreign universities, is designed for curious minds developing novel and innovative citizen-based technologies in various domains like health technology, urban development, waste management, financial inclusion" Prof. Dr. Uday Salunkhe, Group Director WeSchool elaborates.

AWARDS & ACCOLADES

At the same time when markets are opening up towards India's blooming entrepreneurial culture, WeSchool is focused on giving students several opportunities to experiment with ideation marathons combined with rapid prototyping and going to market test drives.

Innovation in teaching

Virtual learning has now become an integral part of education in which professors have begun to adopt smarter technologies to impart better in-class engagement and effective after-class learning. Faculty members have also started contributing to student success through social as well as academic supports such as comprehensive student orientation programs, learner-centered courses, advising, and continuous one-on-one mentorship. "At WeSchool, we believe in nurturing such thought leaders and practitioners. We seek creative minds, who possess the zest for innovation, are willing learners, great collaborators and wish to be groomed for leadership roles."

Tech buzz

Over the years, technology has hand-held the learning system, especially during the pandemic. Technology facilitates our ability to extend classroom community by using web-based platforms and enabling the dissemination of study material in various forms like E-Books, Audio books, E-Learning, Web-based study material, Virtual Class Room.
