

Chief Minister Yogi Adityanath meeting with the beneficiary children of Bal Seva Yojana in Gorakhpur

YOGI GOVERNMENT BECAME SAVIOR OF CHILDREN, GAVE GIFT OF GOOD HEALTH

Since 2017, when chief minister Yogi Adityanath reached at the helm of affairs in the state, the schemes implemented and the works done by him for children have become instrumental for major positive changes.

The data of national family health survey-**5** shows that the growth in UP's performance is more than the national average. The reduction in the number of anemic women is **5.1%** in state, while at the National level this is **1.3%**.

Cases of growth problem in children in state have reduced by **6.6%**, while at National level this reduction is **2.9%**. Cases of less than average weight of children have decreased by **7.4%** in state while at National level the decrease is **3.7%**.

The rate of breastfeeding to infants aged till six months has increased from **41.6%** to **59.7%** in the state. Rate of general vaccination to children has also increased from **51.1%** to **69.6%**. Awareness towards the health of children has also increased in the people of state.

PICU (pediatrics intensive care unit) project which played an important role in controlling encephalitis, has been implemented throughout the state to save children from covid-19. **100** bedded ICU has been prepared in all medical colleges for children.

The effective strategy of the Yogi government against encephalitis resulted in **75%** reduction in cases, while deaths due to the disease also reduced by **95%**. The Gorakhpur model for curbing the infectious diseases brought laurels at National and international level also.
