4G [2009]

30 MBPS

HD STREAMING, SOCIAL MEDIA, COMPLEX GAMING, INTERACTIVE APPS LIKE UBER

5G [2019]

60 MBPS-1 GBPS

GIGABYTE SPEEDS, AI-BASED NETWORKING, AUTOMATED SENSORS

BENEFITS OF 5G

MOBILE USERS

- Ten times faster data transmission and downloads
- With zero latency or delay, streaming your favourite shows on OTT platforms could be faster than ever

HOME

- To support high-end 8k TV (pixels: 7,680 X 4,320), which will give you ultra high definition
- Will popularise VR games, providing true immersion with huge amounts of data processed quickly

HEALTHCARE

- With point-of-care diagnostics, immediate, actionable results to be available at the patient's location
- Connected ambulance services: The latest medical devices will transmit the patient's health data to the hospital in real time
- Remote surgery using robotic arms

BANKING

- Frequent branch visits may be a thing of past with complete formal mobile banking system

EDUCATION

- Digital education to get a fillip: Will help teachers provide an enhanced experience for learners with first-rate communication over long distances

PURCHASES

- Single tap, voice command or gesture to replace the existing complicated payment procedures during online purchases
- Speedy shopping experience with cashier-less store

AGRICULTURE

- Sensors to improve irrigation efficiency, monitor crop health and harvest

MANUFACTURING

- To connect an array of IoT sensors/ devices, raising productivity
- Automated scheduling of process, based on intelligent algorithms, can improve efficiency two to four times and help reduce carbon footprint

GOVERNANCE

- Faster and safer digital identity verification can potentially transform public services

TRANSPORT

- Integrated transit systems like FASTtag to get a boost. It can help efficiently combine different modes of transport to enhance user convenience
- To optimise EV infrastructure, by identifying and communicating with charging stations

SUPER APP

- Private networks; Higher bandwidth to provide multiple services, including payment and financial transaction processing
- To help reduce costs for SuperApp providers like Tata
