

ARMING AGAINST COVID
A Noida resident prepares to receive a booster dose

AFP

Q. What do you think of the current state of the pandemic?

(All figures in percentage)

daily. Omicron's significantly more transmissible sub-variants suggest that the virus is mutating to survive and overcome immunity gained against it. The government remains concerned about the possibility of new variants, the waning of immunity if boosters aren't taken on time and the upcoming festival season that may accelerate the transmission of the virus. States have been sent an advisory to improve testing, the number of boosters given and revert to Covid-appropriate norms. Public support in keeping a vigil against the virus remains vital. Encouragingly, 65.7 per cent said the pandemic may not be as threatening as before but we need to remain careful, 20.1 per cent believe that the danger hasn't abated at all. Only 11.5 per cent felt Covid wasn't a threat any more and that we can return to life as we knew it before Covid. ■

SRM MED STUDENTS MAKE IT BIG, GET PLACED WITH GREAT PAY PACKAGE

It was a moment of pride for the students of Allied Health Sciences of SRM Medical College Hospital and Research Centre at Kattankulathur near Chennai. About 11 students from MSc Audiology and Speech Language Pathology department have been placed in United States of America (USA) at a very handsome pay package. Founder chancellor of SRMIST Dr T R Paarivendhar showered praises on the students who have won the placement with great pay package.

The 11 students have been placed at Pleasanton in California of USA with a salary package of 72,000 USD per annum which amounts to about Rs 55 lakhs in the Indian estimates. The students have won applauds from every one at a function held in Chennai recently.

Pro Vice Chancellor (Medical and Health Sciences) at SRMIST Lt Col Dr. A. Ravikumar said it is a matter of pride for the institution that trained these students. They have passed even the toughest phase and emerged successfully, he said. These students have also brought laurels to their parents. It is a moment of celebration for SRM Medical College, its students have good it a good name with their success, he said.

Speaking further, he said SRMIST usually has a good name for engineering, it is known as an ideal institution for studying courses related to engineering and has out shone many other institutions. Institutions offering programmes from other streams too are not left behind, now they too are putting up an impressive show. SRM Medical College which was established in 2005 is now moving quickly towards glory keeping up with its neighbouring engineering wing, he said.

The secret behind the success of the institution (SRM Medical College) is dedicated clinical oriented teaching, he said. The students had to pass an interview comprising three phases to get placed. The first phase comprised group discussion, the second phase comprised individual round, third round had questions related to the subject. T. Mythili, additional registrar at SRMIST said medical college in the group is now making rapid progress and recording achievements on a great scale.

The success in the interview stands testimony to the care that students get in the institution, she said and added that institution makes every effort to ensure the students get all the best and turn into highly qualified individuals who would efficiently handle responsibilities on the work front. They are soon planning to commence international placements even in Nursing and Physiotherapy courses also, she said. Chancellor of SRMIST T.R. Paarivendhar said students play a crucial role as far as educational institutions are concerned. Alumni of the insitution take the popularity of the institution they study to a greater level.
