ishing thought: that any culture or civilization should have this continuity for five or six thousand years or more; and not in a static, unchanging sense, for India was changing and progressing all the time. She was coming into intimate contact with the Persians, the Egyptians, the Greeks, the Chinese, the Arabs, the Central Asians, and the peoples of the Mediterranean. But though she influenced them and was influenced by them, her cultural basis was strong enough to endure. What was the secret of this strength? Where did it come f r o m ?

I read her history and read also a part of her abundant ancient literature, and was powerfully impressed by the vigour of the thought, the clarity of the language, and the richness of the mind that lay behind it. I journeyed through India in the company of mighty travellers from China and Western and Central Asia who came here in the remote past and left records of their travels. I thought of what India had accomplished in Eastern Asia, in

Angkor, Borobudur, and many other places. I wandered over the Himalayas, which are closely connected with old myth and legend, and which have influenced so m u c h our thought and
