In India, because of the recognized freedom of the mind, howsoever limited in practice, new ideas are not shut out. They are considered and can be accepted far more than in countries which have a more rigid and dogmatic outlook on life. The essential ideals of Indian culture are broad-based and can be adapted to almost any environment. The bitter conflict between science and religion which shook up Europe in the nineteenth century would have no reality in India, nor would change based on the applications of science bring any conflict with those ideals. Undoubtedly such changes would stir up, as they are stirring up, the mind of India, but instead of combating them or rejecting them it would rationalize them from its own ideological point of view and fit them into its mental framework. It is probable that in this process many vital changes may be introduced in the old outlook, but they will not be super-imposed from outside and will seem rather to grow naturally from the cultural background of the people. This is more difficult to-day than it might have been, because of the long period of arrested growth and the urgent necessity for big and qualitative changes.

Conflict, however, there will be, with much of the superstruc-
