can be no lack for any one. The new chemistry is building a new life for mankind. We seem to be on the verge of increasing enormously the power resources of humanity and all manner of epoch-making discoveries hover over the near future.

All this is very comforting and yet a doubt creeps into my mind. It is not lack of power that we suffer from but a misuse of the power we possess or not a proper application of it. Science gives power but remains impersonal, purposeless, and almost unconcerned with our application of the knowledge it puts at our disposal. It may continue its triumphs and yet, if it ignores nature too much, nature may play a subtle revenge upon it. While life seems to grow in outward stature, it may ebb away inside for lack of something yet undiscovered by science.

The Modern Approach to an Old Problem

The modern mind, that is to say the better type of the modern mind, is practical and pragmatic, ethical and social, altruistic and humanitarian. It is governed by a practical idealism for social betterment. The ideals which move it represent the spirit of the age, the Zeitgist, the Yugadharma. It has discarded to a large extent the philosophic approach of the ancients, their search for
