How can the eyes that can see external objects see themselves? And if the external is part and parcel of the internal, what we perceive or conceive is but a projection of our minds, and the universe and nature and the soul and mind and body, the transcendent and the immanent are all essentially one, how then are we, within the limited framework of our minds to understand this mighty scheme of things objectively? Science has begun to touch these problems and though they may elude it, still the earnest scientist of to-day is the prototype of the philosopher and the man of religion of earlier ages. 'In this materialistic age of ours,' says Professor Albert Einstein, 'the serious scientific workers are the only profoundly religious people.'*

**Fifty years ago, Vivekananda regarded modern science as a manifestation of the real religious spirit, for it sought to understand truth by sincere effort.*

In all this there appears **to** be **a** firm belief in science **and yet** an apprehension that purely factual and purposeless science is not enough. Was science, in providing so much of life's furniture, ignoring life's significance? There is an attempt to find a harmony between the world of fact and the world of spirit, for it **was**
