most other scientists of to-day will not agree with him in this or when he says: 'I am absolutely convinced that no wealth in the world can help humanity forward, even in the hands of the most devoted worker in the cause. The example of great and pure characters is the only thing that can produce fine ideas of noble deeds. Money only appeals to selfishness and always tempts its owners irresistibly to abuse it.'

In facing this question, that is as old as civilization itself, modern science has many advantages denied to the old philosophers. It possesses stores of accumulated knowledge and a method which has abundantly justified itself. It has mapped and chartered many regions which were unknown to the ancients. As it has enlarged man's understanding and control over many things, they have ceased to be mysteries to be exploited by the priests of religion. But it has some disadvantages also. The very abundance of its accumulated knowledge has made it difficult for man to take a synthetic view of the whole, and he loses himself in some part of it, analyses it, studies it, partly understands it, and fails to see its connection with the whole. The vast forces science has released overwhelm him and carry him forward relentlessly, and often an
