terminology for denominations above the thousand or at most the myriad (104 = 10,000). In India there were eighteen specific denominations (1018), and there are even longer lists. In the story of Buddha's early education he is reported to have named denominations up to 1050.

At the other end of the scale there was a minute division of time of which the smallest unit was approximately one-seventeenth of a second, and the smallest lineal measure is given as something which approximates to 1 37 X 7-10 inches. All these big and small figures were no doubt entirely theoretical and used for philosophical purposes. Nevertheless, the old Indians, unlike other ancient nations, had vast conceptions of time and space. They thought in a big way. Even their mythology deals with ages of hundreds of millions of years. To them the vast periods of modern geology or the astronomical distances of the stars would not have come as a surprise. Because of this back-ground, Darwin's and other similar theories"could not create in India the turmoil and inner conflict which they produced in Europe in the middle of the nineteenth century. The popular
