So everything continually changes and life in all its forms is a stream of becoming. Reality is not something that is permanent and unchanging, but rather a kind of radiant energy, a thing of forces and movements, a succession of sequences. The idea of time is just 'a notion abstracted by mere usage, from this or that event.' We cannot say that one thing is the cause of something else for there is no core of permanent being which changes. The essence of a thing is its immanent law of relation to other so-called things. Our bodies and our souls change from moment to moment; they cease to be, and something else, like them and yet different, appears and then passes off. In a sense we are dying all the time and being reborn and this succession gives the appearance of an unbroken identity. It is 'the continuity of an ever-changing ideatity.' Everything is flux, movement, change.

All this is difficult for our minds to grasp, used as we are to set methods of thinking and of interpreting physical phenomena. Yet it is remarkable how near this philosophy of the Buddha brings us to some of the concepts of modern physics and modern philosophic thought.

Buddha's method was one of psychological analysis and, again,
