contacts between India and Hellenized western Asia. The great astronomical observatory at Ujjayini (now Ujjain) in central India was linked with Alexandria in Egypt. During this long period of contact there must have been many exchanges in the world of thought and culture between these two ancient civilizations. There is a tradition recorded in some Greek book that learned Indians visited Socrates and put questions to him. Pythagoras was particularly influenced by Indian philosophy and Professor H. G. Rawlinson remarks that 'almost all the theories, religious, philosophical, and mathematical, taught by the Pythagorians were known in India in the sixth century *B.C.'* A European classical scholar, Urwick, has based his interpretation of the 'Republic' of Plato upon Indian thought.* Gnosticism is supposed to be a definite attempt to fuse together Greek Platonic and Indian elements. The philosopher, Apollonius of Tyana probably visited the university of Taxila in north-west India about the beginning of the Christian era.

**Zimmern in his 'The Green Commonwealth1 refers to Urwick's book, 'The Message of*

Plato' (1920). I have not seen this book.
