the problems are more remote, less transient and less connected with our day's routine. For most of us they are entirely beyond our grasp unless we undergo a rigid discipline and training of the mind. And yet all of us have some kind of philosophy of life, conscious or unconscious, if not thought out then inherited or accepted from others and considered as self-evident. Or we may seek refuge from the perils of thought in faith in some religious creed or dogma, or in national destiny, or in a vague and comforting humanitarianism. Often all these and others are present together, though with little to connect them, and we develop split personalities, each functioning in its separate compartment. Probably there was more unity and harmony in the human personality in the old days, though this was at a lower level than to-day except for certain individuals who were obviously of a very high type. During this long age of transition, through which humanity has been passing, we have managed to break up that unity, but have not so far succeeded in finding another. We cling still to the ways of dogmatic religion, adhere to outworn practices and beliefs, and yet talk and presume to live in terms of the scientific method. Perhaps science has been too narrow in its approach to
