the Indian character and genius which have hitherto not been appreciated. But far more important is the rich civilization they built up in their colonies and settlements and which endured for over a thousand years.

During the past quarter of a century a great deal of light has been thrown on the history of this widespread area in south-east Asia, which is sometimes referred to as Greater India. There are many gaps still, many contradictions, and scholars continue to put forward their rival theories, but the general outline is clear enough, and sometimes there is an abundance of detail. There is no lack of material, for there are references in Indian books, and accounts of Arab travellers and, mcst important of all, Chinese historical accounts. There are also many old inscriptions, coper-plates, etc., and in Java and Bali there is a rich literature based on Indian sources, and often paraphrasing Indian epics and myths. Greek and Latin sources have also supplied some information. But, above all, there are the magnificent ruins of ancient monuments, especially at Angkor and Borobudurf.
