people all over the world could not do without some form of religious belief. It had produced many fine types of men and women, as well as bigoted, narrow-minded, cruel tyrants. It had given a set of values to h u m a r life, and though some of these values had no application to-day, or were even harmful, others were still the foundation of morality and ethics.

In the wider sense of the word, religion dealt with the un-charted regions of h u m a n experience, uncharted, that is, by the scientific positive knowledge of the day. In a sense it might be considered an extension of the known and charted region, though the methods of science and religion were utterly unlike each other, and to a large extent they had to deal with different kinds of media. It was obvious that there was a vast unknown region all around us, and sciencc, with its magnificent achievements, knew Httlc enough about it, though it was making tentative approaches in that direction. Probably also, the normal methods of sciencc, its dealings with the visible world and the processes of life, were not wholly adapted to the physical, the artistic, the spiritual, and other elements of the invisible world. Life does not consist entirely of what we see and hear and feel, the visible
