medicine was fairly well developed. Though based mainly on the old text books, considerable experimental progress was made right up to the medieval period. Anatomy and physiology were studied and the circulation of the blood was suggested long before Harvey.

Astronomy, oldest of sciences, was a regular subject of the university curriculum and with it was mixed up astrology. A

very accurate calendar was worked out and this calendar is still in popular use. It is a solar calendar having lunar months, which leads to periodical adjustments. As elsewhere, the priests, or Brahmins, were especially concerned with this calendar and they fixed the seasonal festivals as well as indicated the exact time of the eclipses of the sun and moon, which were also in the nature of festivals. They took advantage of this knowledge to encourage among the masses beliefs and observances, which they must have known to be superstitious, and thus added to their own prestige.

A knowledge of astronomy, in its practical aspects, was of great help to the people who went on the seas. The ancient Indians were rather proud of the advances they had made in astronomical
