approaches, rather frighten me with their vague, formless incursions into infinity. T h e diversity and fullness of nature stir me and produce a harmony of the spirit, and I can imagine myself feeling at home in the old Indian or Greek pagan and pantheis tic atmosphere, but minus the conception of God or Gods that was attached to it.

Some kind of ethical approach to life has a strong appeal for me, though it would be difficult for me to justify it logically. I have been attracted by Gandhiji's stress on right means and I think one of his greatest contributions to our public life has

been, this emphasis. T h e idea is by no means new, but this application of an ethical doctrine to large-scale public activity was certainly novel. It is full of difficulty, and perhaps ends and means are not really separable but form together one organic whole. In a world which thinks almost exclusively of ends and ignores means, this emphasis on means seems odd a n d remarkable. How far it has succeeded in India I cannot say. But there is no doubt that it has created a deep and abiding impression on the minds of large numbers of people.
