is the only right way, leading to truth. We cannot escape from that prison or get rid entirely of that illusion, if illusion it is. Yet I am convinced that the methods and approach of science have revolutionized h u m a n life more than anything else in the long course of history, and have opened doors and avenues of further and even more radical change, leading up to the very portals of what has long been considered the unknown. T h e technical achievements of science are obvious enough: its capacity to transform an economy of scarcity into one of abundance is evident, its invasion of many problems which have so far been the monopoly of philosophy is becoming more pronounced.

**31**

Space-time and the q u a n t u m theory utterly changed the picture of the physical world. More recent researches into the nature of matter, the structure of the atom, the transmutation of the elements, and the transformation of electricity and light, either into the other, have carried h u m a n knowledge much further. M a n no longer sees nature as something apart and distinct from himself. H u m a n destiny appears to become a part of nature's rhythmic energy.
