the costs of transition to industrialism in western Europe were paid for by India, China, and the other colonial countries, whose economy was dominated by the European powers.

It is obvious that there has been all along abundant material in India for industrial development—managerial and technical ability,

skilled workers, even some capital in spite of the continuous drain from India. The historian, Montgomery Martin, giving evidence before an Inquiry Committee of the British Parliament in 1840, said: 'India is as much a manufacturing country as an agriculturist; and he who would seek to reduce her to the position of an agricultural country, seeks to lower her in the scale of civilization.'

That is exactly what the British, in India sought to do, continuously and persistently, and the measure of their success is the present condition of India, after they have held despotic sway there for a century and a half. Ever since the demand for the development of modern industry arose in India (and this, I imagine, is at least 100 years old) we have been told that India is pre-eminently an agricultural country and it is in her interest to stick to agriculture. Industrial development may upset the balance and prove harm-
