spite of British policy, although their impetus was the impact of the new west through the British.

Individual Englishmen, educationists, orientalists, journalists, missionaries, and others played an important part in bringing western culture to India, and in their attempts to do so often came into conflict with their own Government. That Government feared the effects of the spread of modern education and put many obstacles in its way, and yet it was due to the pioneering efforts of able and earnest Englishmen, who gathered enthusiastic groups of Indian students around them, that English thought and literature and political tradition were introduced to India. (When I say Englishmen I include, of course, people from the whole of Great Britain and Ireland, though I know this is improper and incorrect. But I dislike the word Britisher, and even that probably does not include the Irish. My apologies to the Irish, the Scots, and the Welsh. In India they have all functioned alike and have been looked upon as one indistinguishable group.) Even the British Government, in spite of its dislike of education, was compelled by circumstances to arrange for the training and production of clerks for its growing establishment. It could not afford to bring out from
