clearly-defined social objective. Many of these problems cannot be dealt with efficiently on a provincial basis, and the interests of adjoining provinces are interlinked. Comprehensive river surveys are necessary for the formulation of a policy to prevent disastrous floods, to utilise the water for the purposes of irrigation, to consider the problem of soil erosion, to eradicate malaria, and for the development of hydro-electric and other schemes. For this purpose the whole river valley will have to be surveyed and investigated, and large-scale state planning resorted to. The development and control of industries require also joint and co-ordinate action on the part of several provinces. The Working Committee advise therefore that, to begin with, an inter-provincial committee of experts be appointed to consider the general nature of the problems to be faced, and to suggest how, and in what order, those should be tackled. This expert committee may suggest the formation of special committees or boards to consider each such problem separately, and to advise the provincial governments concerned as to the joint action to be undertaken.'

This resolution indicates the kind of advice that was sometimes tendered to the provincial governments. It shows also how desirous
