universities, chambers of commerce, trade unions, research institutes, etc. Twenty-nine sub-committees were also appointed to investigate and report on specific problems. Eight of these sub-committees were for agricultural problems; several were for industry; five for commerce and finance; two for transport; two for education; two for public welfare; two for demographic relations; and one for women's role in planned economy. There were in all about 350 members of these sub-committees, some of them overlapping. Most of them were specialists or experts in their subjects—business-men, government, state, and municipal employees, university profes-

sors or lecturers, technicians, scientists, trade unionists, and police^ men. We collected in this way much of the talent available in the country. The only persons who were not permitted to co-operate with us, even when they were personally desirous of doing so, were the officials and employees of the Government of India. To have so many persons associated in our work was helpful in many ways. We had the advantage of their special knowledge and experience, and they were led to think of their special subject in relation to the wider problem. It also led to a greater interest in planning
