machinery, not machinery as such.' 'If we could have electricity in every village home, I shall not mind villagers plying their implements and tools with electricity.' The big machines seemed to him to lead inevitably, at least in the circumstances of to-day, to the concentration of power and riches: 'I consider it a sin and injustice to use machinery for the purpose of concentration of power and riches in the hands of the few. To-day the machine is used in this way.' He even came to accept the necessity of many kinds of heavy industries and large-scale key industries and public utilities, provided they were state-owned and did not interfere with some kinds of cottage industries which he considered as essential. Referring to his own proposals, he said: 'The whole of this programme will be a structure on sand if it is not built on the solid foundation of economic equality.'

Thus even the enthusiastic advocates for cottage and small-scale industries recognize that big-scale industry is, to a certain extent, necessary and inevitable; only they would like to limit it as far as possible. Superficially then the question becomes one of emphasis and adjustment of the two forms of production and economy. It can hardly be challenged that, in the context of the
