and it was considered undesirable to develop any industries in India which might compete with British industries in the post-war years. This was no secret policy; public expression was given to it in British journals, and there was continuous reference to it and protests against it in India.

Jamshedji Tata, the far-sighted founder of Tata Steel, had vision enough to start the Indian Institute of Science in Bangalore. This research institute was one of the very few of its kind in India; the others were some government institutions with limited objectives. The vast field of scientific and industrial research, which has thousands of institutes, academies, and special

stations in the U.S.A. and the Soviet Union, was thus almost wholly neglected in India, except for the Bangalore institute and some work done in the universities. An effort was made, sometime after World War II started, to encourage research and, though limited in scope, it has produced good results.

While shipbuilding and locomotive manufacture were discouraged and prevented, an effort to build up an automobile industry was also scotched. Some years before World War II,
