the great majority of the agricultural population have been hard hit by war conditions and have suffered greatly. Consumers generally have been progressively ground down by inflation and the rise in prices.

In the middle of 1942 an American technical mission—the Grady Committee—came to India to inspect the existing industries and make suggestions for increased production. They were naturally concerned with production for war purposes only. Their report was never published, possibly because the Government of India vetoed publication. A few of their recommendations were, however, announced. They suggested the production of power alcohol, the expansion of the steel industry, more electric power, greater production of aluminium and refined sulphur, and rationalization in various industries. They also recommended the institution of high-powered control of production, independent of established Government agencies, on the American model.

**It is not so. The Calcutta journal, Capital, of March 9th, 1944, gives the following*

figures for the index of industrial activity in India.

(1935-36=100): 1938-39: 111.1. 1939-40: 114.0. 1940-41: 117.3. 1941-42: 122.7. 1942-43: 108.8. 1943-44: 108.0 (approx.). 1944 (January): 111.7.
