MARUTI SUZUKI DRIVING SCHOOL ACHIEVES MILESTONE

Maruti Suzuki Driving School (MSDS) has achieved the milestone of two million learners under its training programme. MSDS commenced operations in 2005 and now has a widespread network of 520-plus schools spread across 250 cities across India. The milestone of a million learner trainings was achieved in 13 years, but the second million took just five years. MSDS offers a number of practical and theoretical courses, in English, Hindi and seven other regional languages, and utilises advanced training methodologies, which include driving state-of-the-art driving simulators. The driving schools also conduct multiple road safety programmes with schools, NGOs, fleet owners and government sectors to impart safe driving habits and road safety measures.

JK TYRE UX GREEN

JK Tyre & Industries Ltd has developed a new tyre using recycled materials. This is a result of the brand's commitment towards sustainable development. The 'UX Green' tyre offers performance comparable to that of a standard radial tyre. The JK Tyre UX Green tyre has been tested extensively indoors and outdoors on roads as well as on test tracks to validate the performance. It has been designed and developed inhouse by the team at JK Tyre. Based on decade-long research conducted at JK Tyre's Global Tech Centre, the R&D team has worked to create alternative solutions that will allow products to replace conventional petroleum-based materials with sustainable materials. UX Green has been developed with materials like natural rubber, bio-attributed SBR and BR, bio-based oil, recycled rubber powder, recovered carbonaceous black, recycled polyester and steel wire. A majority of these materials are certified by the International Sustainability and Carbon Certification (ISCC).

TVS SMARTXONNECT S10X & S20X

TVS Racing Performance Gear has expanded its portfolio of helmets and riding gear with the new SmartXonnect range of Bluetooth communication devices. The devices are offered in two variants—S10X and S20X—both of which come with JBL audio. The S10X allows the rider to make calls to other riders or connect with the pillion on the intercom while the S20X can connect up to 20 devices at once. Both get Google and Apple voice assistant compatibility, active noise cancellation, dynamic volume control, audio weave intercom and are IP67 rated for water and dust resistance, making them ideal for use in India. Price: Rs 8,499 for the S10X and Rs 10,999 for the S20X.

HYUNDAI SPARSH SANJEEVANI

Hyundai Motor India Foundation has inaugurated multiple telemedicine clinics in Odisha and Uttar Pradesh. They are part of HMIF's Sparsh Sanjeevani social outreach programme, which focuses on providing affordable medical services to rural India. HMIF has added five telemedicine clinics to Odisha and UP each, taking the number of clinics under the Sparsh Sanjeevani programme to 30, which includes clinics in Rajasthan, Gujarat, Madhya Pradesh and Haryana. More clinics are planned for Uttarakhand. These are nurse-assisted clinics where the patient is assessed by the nurse, who then connects the patient to the right medical specialist via video call. This allows for follow-up visits as well, with the entire service costing just Rs 100, including medicines. Pathology labs are empanelled with the clinics to conduct tests, while serious cases are referred to hospitals. Karma Healthcare operates the clinics in association with Hyundai.
