TRANSFORMING UTTAR PRADESH: A P

Uttar Pradesh, increasingly recognized as "New India's Growth Engine," is making remarkable strides toward achieving its goal of becoming a $1 trillion economy. Under the guidance of Prime Minister Narendra Modi and the effective leadership of Chief Minister Yogi Adityanath, Uttar Pradesh has evolved into the "most preferred investment destination" by establishing a strong rule of law and a secure environment. The remarkable transformation in Uttar Pradesh did not occur overnight; rather, it is the result of Chief Minister Yogi Adityanath's unwavering dedication over the past six and a half years. The comprehensive efforts to enhance law and order and bolster the state's infrastructure, initiated when the Yogi Adityanath government came into power in March 2017, are now yielding tangible and positive outcomes.
In this transformed environment, investors are not only finding Uttar Pradesh to be a secure destination but also one that offers the highest potential for returns on investment. This is clear from the sizeable investments–totaling more than Rs 36 lakh crore–that Uttar Pradesh attracted during the Global Investors Summit in February, where the state showcased its evolved business climate to both domestic and foreign investors.

A conducive environment for starting industrial projects in Uttar Pradesh has been created through strong law and order, good governance, investment-friendly policies, advanced infrastructure, and ease of doing business. The outcome of these endeavors became evident during the Global Investors Summit held in February this year, when Uttar Pradesh received more than 24000 investment proposals worth more than Rs 36 lakh crore. A substantial number of investors are eager to establish their projects in Uttar Pradesh. Recognizing the economic potential of these enterprises, banks and financial institutions have shown remarkable enthusiasm, swiftly granting approvals for project funding.

The Reserve Bank of India (RBI)'s August 2023 bulletin sheds light on a transformative investment environment in the state of Uttar Pradesh. According to the bulletin's findings, Uttar Pradesh continues to lead the charts in the total share of approved projects by banking and financial institutions.

> "Six years ago, investment in Uttar Pradesh was a distant dream. Due to the state's poor law and order situation, people were reluctant to start businesses and establish industries. Not only were external investors reluctant, but even local entrepreneurs and businessmen were migrating, seeking opportunities elsewhere. However, today, Uttar Pradesh's law and order system serves as a shining example for the entire nation. Every investor is eager to invest in UP. The investment proposal of more than Rs 36 lakh crore received during the Global Investors Summit in February is proof of this."

In an impressive display of economic prowess, Uttar Pradesh has held the top position for the second consecutive year, securing a substantial 16.2 percent share in the total cost of projects sanctioned by banks and financial institutions during the year 2022-23. This success highlights Uttar Pradesh's unparalleled allure as an investment destination.

Notably, the bulletin reveals a significant and continuous uptrend in the total cost share of projects receiving approval from banks and financial institutions in Uttar Pradesh. This trend has seen a remarkable upswing, starting from an average of 4.4 percent between the financial years 2013-14 and 2020-21. Subsequently, it surged to 12.8 percent in the financial year 2021-22 and peaked at 16.2 percent in the financial year 2022-23. In essence, this trend signifies the unwavering support of the banking sector for investors and projects in Uttar Pradesh, further solidifying the state's reputation as a thriving hub for investment opportunities.
