REFERRED INVESTMENT DESTINATION

> Today, Uttar Pradesh is touching new heights of progress, including increased investments, because there is a sense of security among the people, crime has been curbed, and a fear-free and forward-moving society is emerging. Such a rule of law and order instills confidence among the people. Since the rule of law has been established, UP is advancing to new levels. It has to be understood that if you want to bring investment to the state, then you will have to give first priority to security, as Uttar Pradesh has done.

SECTORAL POLICIES DRIVING GROWTH AND INVESTMENT

Setting a precedent that was previously unheard of, the government swiftly organized a groundbreaking ceremony for industrial investments within a mere 100 days of taking office for the second term. Chief Minister Yogi Adityanath himself graced the third edition of this groundbreaking ceremony, held on June 3, 2022, at the Indira Gandhi Pratishthan in Lucknow. The moment Prime Minister Narendra Modi inaugurated the event, the countdown for launching 1406 investment projects worth a staggering Rs 80,224 crore in the state began. The government led by Chief Minister Yogi Adityanath, which achieved the remarkable feat of returning to power in Uttar Pradesh in March 2022, wasted no time in setting the wheels in motion to fortify the state's industrial ecosystem.

The Yogi government conveyed a resoundingly positive message to investors by implementing 30 pivotal policies, including the Industrial Investment and Employment Promotion Policy, Micro Small and Medium Enterprises (MSME) Policy, Textile and Garment Policy, and Dairy Production Promotion Policy, among others. These policies were meticulously crafted, taking into account the insights and recommendations of investors and industrialists.

Building on this momentum, the Yogi government organized the first-ever Global Investors Summit (GIS) in February 2023. This summit resulted in Uttar Pradesh securing investment proposals exceeding a staggering Rs 36 lakh crore, reaffirming the state's evolving and investor-friendly environment.

SMALL DISTRICTS THRIVE WITH INVESTMENT

Backward districts have reaped the greatest benefit from the investment that has come as a result of the favorable environment in UP. Industrial investment has changed the face of these districts. Hardoi, a district near Lucknow, was never known for its industries, but it now has a different picture on the industrial map. Webley & Scott, a well-known gun manufacturer in England, decided to open a unit here with Sial Group 4 years ago as part of the Make in India campaign.

Because of the different environment of UP, the famous foreign company chose the Hardoi district, 450 kilometers away from the national capital, New Delhi, to open its first unit in the country. Manufacturing and sale of revolvers have started in Sandila industrial town of Hardoi. Due to the investment environment created in UP, there are many cases of industrial units being attracted here for investment. The production of chips started in the Mathura plant of the famous beverage company PepsiCo in April of this year. Work on another unit is underway in Gorakhpur, where soft drinks and milk-based beverage products will be manufactured.
