

SURAT SMART CITY

SOLVING URBAN ISSUES, THE SMARTEST WAY

Termed as the **"Diamond City"** and **"Textile City"**, Surat is known for its fastest growing economy. The city is a major economic powerhouse and renowned for thriving economy.

Surat Municipal Corporation has played a pivotal role in growth of the city. SMC is considered as one of the leading ULBs in India having implemented various administrative reforms and undertaken futuristic projects.
Under Smart Cities Mission, with a vision to make Surat city more liveable, sustainable and improve the quality of life by creating better infrastructure and implementing smart solution, Surat Smart City has taken up diverse projects spanning across different municipal domains right from heritage conservation project on restoration of Surat's historic fort to creation of Integrated Command & Control Center.

SMART GOVERNANCE

Surat Smart City promotes digital governance and citizen engagement through the use of technology. To strengthen the IT infrastructure, Surat has created 128 km dedicated OFC network and data center. Under Suman Eye Project, CCTV network of over 2600 camera covering over 700 locations has been created. Various smart solutions like Smart SWM system, Vector Borne Disease Control System, Smart Biometric Attendance system, ITMS, AFCS are implemented by Surat Smart city.

INTEGRATED COMMAND & CONTROL CENTER

Surat Urban Observatory & Emergency Response Center (ICCC) is an administrative control center for SMC. Municipal Commissioner, Ms. Shalini Agarwal IAS mentioned that ICCC is immensely helping improve service delivery, optimally utilise municipal assets and bring in synergy between different departmental activities by effective monitoring of city operations. The ICCC is playing a pivotal role in promptly identifying and rectifying abnormal events, ensuring efficient corrective actions are taken. It notably played a crucial role during the COVID-19 pandemic. Moreover, it continues to be a vital asset during disasters or disaster-like situations, facilitating effective information dissemination and cross department collaboration.

STRENGTHENING PUBLIC TRANSPORT

Surat is operating countries largest BRT network. The public transport service network covers 95% area comprising network of 915 buses. The smart city projects like Integrated Transit Management System (ITMS) and Automatic Fare Collection System (AFCS) implemented under Smart Cities Mission are playing critical role in monitoring transit parameters like trip adherence, schedule deviation, route violation, bunching, etc. The mobile app, Open Loop RuPay based Surat Money Card, Public Information System, etc. are easing the commute through public transport. This has resulted in improvement in ridership which rose from 1.3 lakh in 2017 to 2.6 lakh at present.

HERITAGE CONSERVATION

As told by Sh. Daxesh Mavani, Mayor, Surat's historic fort, once a barren and deteriorated structure and having lost its identity, has been meticulously restored and proudly presented to the people of Surat. Extensive archival research was conducted across multiple archives to ensure that the restoration work was based on accurate historical references and information. Value-based authentic restoration now shed light on the diverse historical layers of history spanning from 1372 Tughlaq era, 1546 Gujarat Sultanate era, Mughal era, British era, Dutch era, to Post Independence era.

HOUSING FOR ALL

Affordable housing projects consisting 3958 Dwelling Units under PMAY in ABD area have been under taken under convergence under Smart Cities Mission. In all in Surat, over 82,000 affordable houses constructed which has helped reduce the slum population which was 28.87% as per Census 2001 to 5.78% as per current estimates.

PROMOTING USE OF RENEWABLE ENERGY

Surat is one of the leading ULB in terms of use of renewable energy with energy generation of 38.7 MW from wind, 7 MW from solar and 5.35 MW from biogas. The current share of renewable energy is 28.5% of total energy consumed by SMC and will be further increased to 33% shortly and to 50 % by 2029-30.

RECYCLE, REUSE OF SEWAGE WATER

Surat established 40 MLD Tertiary Treatment Plant at Dindoli under Smart Cities Mission and enhanced overall TTP capacity to 115 MLD. This treated waste water is supplied to industries generating annual revenue of Rs. 140 cr. Surat intends to reuse 70% of TWW by 2030 and 100% by 2035.

CREATING VIBRANT PUBLIC PLACES

Surat has transformed its public spaces into vibrant and well-planned areas, featuring attractive elements like well-designed roads, dedicated cycling and walking tracks, informative signages, stylish street furniture, and captivating sculptures. Canal Pathway, Iconic Airport Road, VIP Model Road and Dumas Walkway stand out as dynamic public destinations that are enjoyed by people from all walks of life.
