

Niranjan Gupta, Chief Executive Officer, Hero MotoCorp with the Brand Ambassador- Hrithik Roshan at the launch of the Hero Karizma XMR

THE LEGEND IS BACK

Hero MotoCorp had changed the game many years back with the Karizma and now the legend is back in an all new avatar. Enter the highly anticipated Karizma XMR. In keeping with its Mission to Create, Collaborate, and Inspire, the new Karizma XMR is the result of a unique collaboration between the world-class engineers at Hero's state-of-the-art Hero Center for Innovation and Technology (CIT) in Jaipur and the Hero Tech Centre Germany (TCG) near Munich.

Niranjan Gupta, Chief Executive Officer, Hero MotoCorp added, "The launch of Karizma XMR, marks yet another significant milestone in our journey to 'win in premium'. We are rapidly building a full portfolio in this segment, in line with our strategy. The focus will not just be on products with first-in-class and best-in-class features, but also on providing an overall premium experience through our Hero 2.0 stores and exclusive range of premium outlets going forward. There's more to come as we go forward in this fiscal year."

The return of the legend after nearly six years also marks many firsts for the company. The Karizma XMR comes with a brand new 210cc engine which is liquid-cooled. It also features a DOHC setup. The DOHC setup and the DLC-coated finger cam followers help achieve a better high-end performance and improved engine durability. The new engine now has an increased oil replacement limit of 12,000 kms. Both these features are a first from Hero MotoCorp signalling the company's R&D prowess.

With an extensive range of accessories, you can turn the new Karizma XMR into precisely the bike you need. Accessories such as an anti-glare rearview mirror, hugger fender, mobile holder, magnetic tank bag, and thigh pads add to the overall classiness of the motorcycle and enable the customers to extract more out of their bike according to their riding needs and style.
