Embrace Good Health

25 years of doing the impossible

Twenty five years ago, we set out with a purpose. To do the impossible.This was founded on an unshakable belief. That the impossible is what no one can do, only until someone does it. In fact, every medical breakthrough once seemed an impossibility.

For twenty five years, at Amrita, we've been taking on the impossible. And doing it. Employing pioneering methods and techniques. Embracing ground-breaking practices and rapidly advancing technologies. Blazing trails all the time, for the rest to follow. So that we keep on transforming the lives of people who come to us. Offering them care. Offering them hope. For a cure. For relief from pain. For a return home. We keep on reshaping their future. Rewriting their life stories. Driven by a will to overcome. And the courage to do the impossible.

• Kerala's first liver transplantation • India's first extended reality lab in a medical facility • India's first medical 3D printing facility • Asia Pacific's first ROSA robotic-assisted neurosurgeries • India's first hospital to do the largest number of high-precision robotic liver transplants • India's first fully robotic liver transplant • India's first robotic-assisted knee and hip replacement • Largest number of robotic surgery specialties in Kerala • India's first hand transplantation • Kerala's first gender affirmation surgery • Kerala's first implantation of the world's smallest artificial heart pump • Kerala's first pelvic dysfunction clinic
