

“My husband passed away in 1987, but the mutation was yet to be done in my name. Finally, it happened smoothly, thanks to Mission Basundhara.”

Arpana Choudhuri, 78, Housewife
Borpalaha, North Guwahati

the real time status of application and service delivery. Through Integrity Helpline of Mission Basundhara, people could lodge complaints and obtain clarity on process related queries. This two-way communication helped people by expediting resolution of grievances faced during service delivery.

After disposal of applications received, these services were migrated, on May 11, 2022, to the Assam Right to Public Service Act (ARTPS) portal for continuity. Hence, people can avail the services through the ARTPS portal which is now the single window for application.

There are around 1,074 un-surveyed villages and 18,789 cadastral villages in Assam. The survey of these non-cadastral villages was done to grant ownership rights to the inhabitants and link them to economic drivers and government initiatives. The re-survey of some cadastral villages is also being undertaken through ultra-precise drone mechanism supplemented by modern ground truthing techniques.

Nearly 3,500 people from all strata of revenue administration, including officers at the helm of policy making, implementation and monitoring, technical developers, survey wing, district administration, field revenue officers and staff delivering the services, village heads and mouzadars mobilizing the community, were engaged in the implementation of the mission.

“It was a long-pending partition case. I applied online though I did not expect the department to take any action. To my surprise, a government officer visited our home, and the case was resolved within a week. I was event sent an SMS about the resolution.”

Tonkeshwari Phukan, 70, Housewife
Moran, Dibrugarh

This unprecedented initiative had a snowball effect in terms of galvanising the entire revenue machinery, generating awareness of land related services amongst people, integrating various databases to trigger updating and automating services.

With an outlay of Rs 225 crore, this mission will ensure that land records in the state is completely digitalised by December 2023. Funds for the implementation of the mission come from state government resources and also through Government of India's Digital India
