

for paddy. In addition to procuring rice at support prices, the government provides an input subsidy of 9,000 rupees per acre to paddy-producing farmers under the Rajiv Gandhi Kisan Nyay Yojana. Since the year 2019-20, approximately 22,000 crore rupees have been directly deposited into the bank accounts of farmers through this scheme.

Suraji Gaon Yojana

The Suraji Gaon Yojana of the Chhattisgarh government, comprising the Narva, Garva, Ghurva, Badi Development Program, and Godhan Nyay Yojana, has not only revitalized the rural economy but has also been effective in making people economically self-reliant. Through the Narva Development Program, the state has received assistance in water conservation through treatment of nearly 14,000 rain-fed streams, resulting in improved groundwater levels. Irrigation facilities have improved, and the area under double cropping has increased.

The Garva Program has contributed to the conservation and enhancement of livestock. Livelihoods have improved through animal husbandry. The Ghurva and Badi Development Programs have aided in promoting organic farming and improving nutrition levels in the state.

The Godhan Nyay Yojana of the Chhattisgarh government has created multifaceted employment and self-sustainability options. Under this scheme, the government's purchase of cow dung at two rupees per kilogram and cow urine at four rupees per liter has provided rural livestock keepers with an additional source of income. This has led to the production of vermicompost and other materials from cow dung, organic pesticides from cow urine, and the production and sale of natural paint from cow dung, resulting in increased income for the people. More than two lakh women have become economically empowered by adopting various income-generating activities related to cattle rearing through the formation of self-help groups.

Policies for Farmer Welfare and Millet Mission in Chhattisgarh

Due to the farmer-friendly policies of the Chhattisgarh government, the number of farmers selling paddy at support prices in the state has increased from 12 lakhs to over 24 lakhs today. Paddy procurement has also increased from 55 lakh tonnes to over 107 lakh tonnes. In the past five years, the quantity of paddy sold by farmers and rice production in Chhattisgarh has doubled. Paddy cultivation area has expanded from 24 lakh 46 thousand hectares to 31 lakh 17 thousand hectares. There were 1,333 primary agriculture cooperative societies, which have now increased to 2,058. In Chhattisgarh, fish farming, lakh cultivation, silk cultivation, and beekeeping have also been recognized as agricultural activities. The Chhattisgarh Millet Mission, along with the purchase of Kodu-Kutki and Ragi at support prices, has increased the income of millet-producing farmers by providing them with a subsidy of 9,000 rupees per acre.*

Comprehensive Healthcare Services

The Chhattisgarh government has initiated several healthcare schemes with the aim of improving healthcare services and making them more accessible to the public. These include the Chief Minister Haat Bazaar Clinic Scheme, Brother-Sister Clinic Scheme, Dr. Khubchand Baghel Healthcare Assistance Scheme, Chief Minister's Special Healthcare Scheme, and Shri Dhanvantari Generic Medical Stores Scheme, all of which have provided significant relief to the people.

Expansion of Minor Forest Produce Collection

In order to improve the condition of forest
