tion of FATF (Financial Action Task Force) standards to address money-laundering and terrorism financing risks. G20 finance ministers and central bank governors will discuss taking forward the roadmap at their meeting in October. FATF is an intergovernmental watchdog founded in 1989 that leads global action to tackle money-laundering, terrorist and proliferation financing.

At the start of the G20 Summit, Union finance minister Nirmala Sitharaman said that India's presidency of the G20 will indeed establish a global framework to regulate crypto assets. "The presidency will support the IMF and the FSB in setting up the contours of the regulatory framework for a globally coordinated approach to crypto assets," she told the media in New Delhi on September 9. According to experts, as quoted in the media, CARF, developed in light of the rapid growth of the crypto-asset market and pursuant to a mandate from the G20, provides for the reporting of tax information on transactions in crypto assets in a standardised manner. Crypto transactions undertaken by Indians on foreign-domiciled crypto exchanges will also come under the purview of automatic exchange of information protocol under CARF, they say. According to industry players, India has demonstrated impressive leadership in advocating a global consensus on regulating cryptos. "The government has not only taken steps to promote discussions but has also made dedicated efforts to enhance their understanding of virtual digital assets. This signifies progress in the desired direction," says Venkatesh R., senior vice-president and public policy head at CoinSwitch, a Bengaluru-based crypto exchange that boasts 18 million customers.

FM NIRMALA SITHARAMAN SAID INDIA'S G20 PRESIDENCY WILL ESTABLISH A GLOBAL FRAMEWORK TO REGULATE CRYPTO ASSETS

THE IMPLICATIONS

What will the impact of these measures be on the Indian cryptocurrency business? Currently, many G20 nations have already put in place some form of crypto-asset regulations within their respective jurisdictions, says Venkatesh. "They have managed to ring-fence their domestic ecosystems from crypto-related risks while also ensuring the technology and innovation benefits. It is only natural for this to be universally accepted at the G20," he says. There is still more progress to be made at the individual country level, but the IMF and the FSB have laid the groundwork for the adoption of their guiding principles, he adds.

Experts expect regulations to be put in place for cryptocurrencies just as there are regulations for other asset classes such as equity or real estate. "In every asset class, there are regulations, since these financial instruments have cross-border implications," says Ashvin Parekh, a financial
