9	NATIONAL INSTITUTE OF FASHION TECHNOLOGY	Shillong
10	NATIONAL INSTITUTE OF FASHION TECHNOLOGY	Kangra

fashion, it's been in NIFT's nature to embrace changing times, good or bad. So, during the Covid-19 pandemic, it was no surprise that a number of faculty members pursued relevant Massive Open Online Courses (MOOCs) to learn new skills offered by various global providers. Craft demonstrations by renowned artisans and practitioners were organised virtually for Ajrakh block-printing, Bagh handblock printing, Patola weaving, metal embroidery, Gota Patti embroidery, and dhurrie weaving, to acquaint the students with the heritage crafts of India.

NEW INITIATIVES

- **With discussions on climate change and sustainability taking centre stage globally, sustainable fashion as a concept has been included in the academic framework of NIFT, New Delhi**
- **The institute has taken up zero-waste designing and manufacturing and upcycling as new areas of study**

Sustainability as a concept is picking up steam in fashion circles, and hence zero waste designing and manufacturing, and upcycling are now part of the institute's academic vision. Over the last year, NIFT, New Delhi, has also initiated measures for developing a green campus, such as electricity conservation, water conservation, and rainwater harvesting. The new building at the campus has a glass façade for energy-saving and keeping the premises cool, along with comprehensive waste and water management systems. ■
