

ROOT*ed* in Industry-relevance

ROOTS Collegium is deeply rooted in the belief that education is the key to unlocking countless possibilities. From a humble 15-student commerce college in 1991, it has blossomed into a full- fledged institution with 4 colleges across 2 campuses. offering more than 23 courses and with over 15,000 student alumni.

The Founder Chairman, B.P. Padala, hailed from Ramavaram Village, Warangal district, Telangana. This erstwhile engineer donned the entrepreneurial hat to establish **ROOTS Junior College, Koti, in 1991**, using a capital of just Rs 1 lakh. Entrenched in the love for teaching, learning, and interacting with students, the core team continues to remain committed to ensuring that they plant the roots of education without making it a bitter experience for children.

In **2008,** Padala noticed the lack of options outside for students without an aptitude for science. He shifted his focus to **Liberal Arts.** ROOTS became the first Degree College in Telangana to get an Osmania University affiliation for its BBA course. Over the years, ROOTS has been offering exciting New Age Specializations such as data science, film, media, design, and hotel management open avenues and make students industry-ready. ROOTS gives its students an edge in the job market by ensuring regular interaction with industry experts through 40% learning outside of the classroom. Besides this, strategic tie-ups with prestigious institutions like Edexcel, London (management), the Association of Chartered Certified Accountants in London (accountancy) etc. help students layer their resumes with value added certifications.

As Dean Vidya aptly puts it, *"ROOTS Degree College is a pioneer educational institution aimed at transforming management educa-*

B. P. Padala, Chairman

VOICE OF THE STUDENT

My education at Roots has helped me immensely, the methodology of learning at Roots has developed me as an individual, helped me understand how corporates work and help me know the scope of improvement that is needed for future. Our industrial trips to Pepsi , Agra , Kullumanali and Dubai gave me a lot of exposure and knowledge. I am glad that I was a part of Roots.
