HOW THE COLLEGES ARE DISTRIBUTED

Karnataka has the highest density of colleges among states, Bihar and Delhi the lowest

Source: All India Survey on Higher Education, 2020-21

a brand-new interactive online portal (https://bestcolleges.indiatoday.in) for easy access, analysis and guidance to the Best Colleges survey results across 14 major streams. The portal displays the ranks of colleges for the past six years. One can not only check the overall ranks but also compare select colleges across the five broad parameters of quality: intake quality and governance, academic excellence, infrastructure and living experience, personality and leadership development and placement and career. The portal will also guide viewers to individual pages of colleges for detailed information on the courses offered, admission fees, cut-offs, placements, faculty and industry connect. All of which make it truly a goldmine of information and analysis that can help every stakeholder make the right assessment of any college.

This effort to constantly reinvent and keep abreast of the latest developments is what makes the India Today Best Colleges Survey, conducted by reputed market research agency Marketing and Development Research Associates (MDRA), a credible and consistent assessment of colleges in India. Having been in the business for over two decades, this survey has emerged as the last word on the rankings of the higher education institutions.
