CENTRE FOR INNOVATION AND TECHNOLOGY TRANSFER

The Centre for Innovation and Technology Transfer aims to be a leading private deep-tech startup hub. The Centre will support students, scientists, faculty, alumni members and external entrepreneurs in creating successful deep tech startups, and translating benefits to the society. The Centre nurtures technology ventures by providing technological and business support to help entrepreneurs establish business ventures. In addition to this, the centre supports the University's scientists and faculty in product development, industry connect and commercialization.

ADVANCED CHARACTERIZATION FACILITY

Advanced Characterization facility like X-ray Diffractometer (XRD), Field Emission Scanning Electron Microscope (FESEM) and High Resolution Scanning Transmission Electron Microscope (HRSTEM) are available at the centre which can be used for understanding the structure, composition, shape, size and morphology of different kinds of materials at Nano scale.

MEDIA CENTRE

A Media Centre with state of the art infrastructure has been set up to facilitate preparation of e-content. This Centre helps the faculty in creating high quality Video Lectures and e-content to support online teaching-learning process.

AI SUPERCOMPUTING FACILITY

The AI Supercomputing Lab is a groundbreaking AI research facility that aims to become a strong center for AI research. This lab aims to train and engage students and researchers in cutting-edge AI algorithms and its applications. The facility houses a 95-node supercomputer with 9.6 Peta FLOPS of AI performance. A tiered storage architecture is adopted to utilize flash storage and hence make data server provide industry-topping data speeds.
