ing on the campus in terms of programmes, tie-ups, collaborations, specialised centres of excellence, start-ups, incubators and placements. Says Rangan Banerjee, the director of IIT Delhi, "There is a strong academic environment on the campus with a constant focus on research and innovation, and it only enhances our industry-academia interface."

Two to three centres of excellence were set up about two years back even as the institute set up the Department of Energy Science and Engineering. Some of the new programmes and courses added in the last one year at the undergraduate level include a bachelor's in Design, BTech in Computational Mechanics and Materials Science and Engineering. Among the master's programmes are MTech in Artificial Intelligence (AI), Robotics and E-mobility. "Quite an impressive number of major research was also done in the areas of clean environment, future energy and water needs, smart infrastructure, future healthcare and technology to safeguard Indian borders," says Banerjee.

The total number of sponsored research projects is 286 and the con-
