2	NATIONAL INSTITUTE OF TECHNOLOGY PUDUCHERRY, KARAIKAL	Puducherry
3	ANDHRA UNIVERSITY COLLEGE OF ENGINEERING	Visakhapatnam

sultancy projects 346. Right from the R&D on an air quality monitoring system, emission reduction in internal combustion engines, and receptor modelling of pollutants to energy efficiency in green buildings, fabric-based water filtration systems and disinfection of drinking water, the faculty and students have their hands full at any given point in time.

And so, while one AI/machine learning model developed by IIT Delhi-led researchers worked on a project that predicted a normal monsoon for 2023, another team of researchers developed a mobile robot called 'Robomuse 5.0' suitable for various industries to carry payloads up to 100 kg. Yet another team of innovators worked on a project that could estimate the probability of getting infected with the Covid-19 virus in indoor spaces.

The start-up and incubator space also witnessed quite an activity and buzz in the last year. A start-up, Medicfibers, incubated in collaboration with AIIMS, Delhi—for example—developed an antimicrobial solution that provides long-lasting protection against hospital-acquired infections. ■
