

TELANGANA

THE POWER HOUSE ILLUMINATING PROGRESS

The formation of the state was accompanied by challenges in the power sector, ranging from erratic power supply to power outages. Telangana, known for its robust infrastructure and forward-thinking policies, has made giant strides in the power sector. With a focus on providing reliable and affordable electricity to its citizens, the state government has implemented a series of initiatives to enhance power generation, transmission, distribution, and promote renewable energy sources, which have propelled the state towards energy sufficiency and sustainable development.

Telangana's progressive approach to the power sector sets an exemplary model for other states, contributing to India's overall energy security and environmental sustainability.

These efforts have resulted in 24 hours of reliable power supply to all categories of consumers, including agriculture. Telangana enjoys the distinction of being the only State to supply 24 hours' free power to **27.49** Lakh agriculture connections.

The per capita consumption in the State is 2126 Kwh (2021-22), which is one of the highest in the country as against **1356** kwh during 2014-15 and the All India average of 1255 Kwh in 2021-22.

To provide 24 hours of supply in the state, Transmission& Distribution System has been strengthened with an investment of Rs. **39,321** crore.

The TS Government has provisioned a subsidy of Rs. **11,500** crore to the power sector for providing free power to agriculture and other subsidized categories in the FY 2023-24 Budget

After formation of the state, 10,789 MW of installed capacity has been added-from 7778 MW as on 02-06-2014 to 18,453 MW as on 30-04-2023

Telangana State has one of the highest solar installed capacities at 5741 MW (only 74 MW as on 02-06-2014) in the country, with a total renewable capacity of 6274 MW.

Telangana power utilities have absorbed 22,722 outsourced personnel, whose salaries are paid directly.
